Re: United States Patent Application for a "METHOD AND SYSTEM FOR  
DEPLOYING CONTENT TO WIRELESS DEVICES",  
filed herewith, in the name of Rudy BONEFAS, et al.;  
U.S. Patent Application No. to be assigned  
(Our Ref. No.35825-164451)

Dear Sir:

**PETITION FOR EXPEDITED ISSUANCE OF A FOREIGN FILING LICENSE**

Petition is hereby made pursuant to 37 C.F.R. § 5.12(b) for expedited issuance of a foreign filing license for the above-referenced patent application. A duplicate copy of this petition is included for return to the undersigned. Please charge the requisite fee of \$130.00 and any other fees to Deposit Account No. 22-0261. Two additional copies of this petition are included.

The application is directed to a system for providing server registration and discovery services during a startup sequence, and the invention disclosed therein was made in the United States by inventors Rudy Bonefas, Michael Miller, Dale Shelton and L. Jay Wantz who are citizens of the United States. It is believed that the application is of no interest from a security standpoint.

An expedited license is required because the inventors and their colleagues in business desire to file a corresponding patent application in Europe and Japan as soon as possible but in no event later than the date on which the invention will be disclosed to potential international customers and partners. Currently, it is anticipated that such disclosure will take place within weeks. Additional foreign or PCT applications are contemplated within the priority period of the above-referenced United States patent application.

Please contact the undersigned by telephone as soon as the license is granted and he will arrange to have it picked up.

Respectfully submitted,

Jeffri A. Kaminski
